

# KDK FANS SELECTS PRONTO-Xi SOLUTION

KDK Fans, one of Malaysia's premier marketing companies of electrical ventilation products today announced it has selected PRONTO-Xi solution from SL Information System, a leading enterprise management solutions provider to provide back-end solutions to its operations.

Selected from over seven other vendors, PRONTO-Xi will replace KDK's current legacy system across the company's office and distribution centres with its Financial and Distribution modules. PRONTO-Xi will service all of KDK's operations such as warehousing, supply chain and distribution.

Michael Yeo, COO of KDK Fans believes that PRONTO-Xi solution will provide the company with an integrated enterprise solution and enable it to improve its productivity and efficiency dramatically.

"The real-time functionality of the Pronto system particularly in the area of inventory management, will enable our staff to make more informed decisions when advising clients and tracking delivery orders."

"PRONTO-Xi's ability to run on Linux was another major factor for us in choosing the software. While there are many ERP vendors out there, not many were able to run on the Linux operating system and give us the full breadth of features that we needed," said Yeo.

According to Ho Wai Chun, PRONTO Business Manager of SL Information System, PRONTO-Xi's feature-rich software will allow KDK Fans to streamline its inventory and ultimately enhance its customer service levels significantly.

"We look forward to working with KDK Fans as they continue to expand rapidly in the Malaysian market," said Ho from SL Information System.

The PRONTO Solution, coupled with support from SL Information System has been extremely successful in fulfilling the information technology needs of the business community in Malaysia, simply because its application software and services provided and implement business solutions easily and speedily at a competitive cost and hence a quick return on investment. PRONTO solution can be utilized by not only manufacturers or industrial products but also for consumer product companies, as well as large and/or chains of retail outlets." Mr. Ho commented.

## About KDK Fans (M) Sdn Bhd

KDK Fans (M) Sdn Bhd (KDKM) is a leading marketing company of electrical products such as ventilating fans, electric fans, ceiling fans, air curtains, hand-dryers and general electrical appliances.
